This fact was curiously illustrated in the case of Magellan, the Portuguese captain, who sailed round the world from east to west in 1522, and, having crossed the magic line of "day's birth" in his wan-derings, his calendar became, of course, a day in arrear. The sailors were com-pletely ignorant of this, and finding on landing at home that their Sabbath was falling on a Monday they accused one another of tampering with the reckon-ing. It was not for some time that the true explanation was discovered.
